INTERNATIONAL CLINICAL FELLOWSHIP TRAINING PROGRAMMES

PATHOLOGY

ACADEMIC YEAR 2019/2020
Become a World-Class Specialist

The Royal College of Physicians of Ireland is an internationally recognised postgraduate college dedicated to the education and training of medical doctors.

Training doctors to become world-class specialists is at the heart of what we do. We believe that being a doctor is one of the most rewarding and important professions there is and we are committed to helping you reach your full potential.

We offer postgraduate specialist training programmes, examinations, diplomas and educational courses to equip doctors with the skills and knowledge they need to care for patients and run safe and efficient healthcare systems.

Our training programmes incorporate both clinical and non-clinical training, and are designed to produce skilled, confident doctors who can provide world-class medical care and handle the everyday challenges of a busy health service.

Hands-On Structured Training

Ireland has a long-standing tradition of providing Postgraduate Specialist Medical training to International doctors. RCPI has, in collaboration with the Health Services Executive of Ireland, recently developed a range of programmes designed specifically to meet the needs of international medical graduates.

The International Clinical Fellowship Programme (ICFP) provides a route for overseas doctors wishing to undergo structured and advanced postgraduate medical training in Ireland. The ICFP enables suitably qualified overseas postgraduate medical Trainees to undertake a fixed period of active training in clinical services in Ireland. The programme is offered over one to two years of clinical training, after which the overseas doctors will be required to return to their country of origin. In certain circumstances, the period of training may extend to three years.

The purpose of the ICFP is to enable overseas Trainees to gain access to structured training in active clinical environments that they cannot get in their own country, with a view to enhancing and improving the individual’s medical training and learning and, in the medium to long term, the health services in their own countries.
International Clinical Fellowships Available in Following Specialties:

- Chemical Pathology
- Clinical Microbiology
- Haematology (applicants must hold MRCPI or MRCP UK)
- Histopathology
- Immunology

Train with a Consultant

This Programme will allow you to access a structured period of training in leading training hospitals around Ireland. You will follow a structured curriculum and will be attached to a Consultant Trainer and fully participate in the clinical work of the Consultant’s team.

Participation in on-call is viewed as a key component of training and therefore Trainees on the International Clinical Fellowship Programme are advised that they may be required to participate in the on-call rota of their department.

Structured Educational Programme

As well as workplace based learning you will have the opportunity to gain additional learning through our formal educational programmes including:

- Study days
- Mandatory and optional courses
- Society Meetings and Conferences
- Lectures
- Journal club
- Audit
- Research

These elements of the training programmes give doctors an opportunity to expand their knowledge base within their speciality as well as honing their core knowledge and clinical judgement skills needed to enhance their career and take up senior positions.

"Being a Trainee with the RCPI was a dream come true for me. One of the most important things I learned from being a Trainee in Ireland is how to improve doctor-patient communication. If you want to understand the meaning of patient-centred care, just come here. There really is person centred care and great doctor-patient communication, inside and outside the hospitals."

Dr Abrar Jamal Al Waheed
Clinical Fellowship Trainee in Haematology
Supporting your move to Ireland

We know that moving to another country involves a lot of preparation and paperwork. We are committed to making this process as easy as possible for all doctors who are accepted onto our international training programmes.

The support we offer in association with Castel Education, an agency that specialise in supporting international students coming to Ireland, includes:

- Visa and immigration assistance, including liaising with the Irish Embassy on your behalf
- Helping you apply for registration with the Irish Medical Council
- Helping you make travel arrangements
- Collecting you at the airport in Ireland
- Helping you find suitable accommodation
- Helping your family members move to Ireland, e.g. finding suitable schools
- Assistance with setting up banking and mobile phone accounts
- Emergency telephone support

“Moving outside of your own country is not easy for everyone. What made it very easy for me was the support I received from RCPI and Castel Education. They were extremely supportive from day one, and made the move from my country very smooth and easy.”

Dr Abrar Jamal Al Waheed
Clinical Fellowship Trainee in Haematology
