Become a World-Class Specialist

The Royal College of Physicians of Ireland is an internationally recognised postgraduate college dedicated to the education and training of medical doctors.

Training doctors to become world-class specialists is at the heart of what we do. We believe that being a doctor is one of the most rewarding and important professions there is and we are committed to helping you reach your full potential.

We offer postgraduate specialist training programmes, examinations, diplomas and educational courses to equip doctors with the skills and knowledge they need to care for patients and run safe and efficient healthcare systems.

Our training programmes incorporate both clinical and non-clinical training, and are designed to produce skilled, confident doctors who can provide world-class medical care and handle the everyday challenges of a busy health service.

Hands-On Structured Training

Ireland has a long-standing tradition of providing postgraduate specialist medical training to international doctors. RCPI has, in collaboration with the Health Service Executive of Ireland, recently developed a range of programmes designed specifically to meet the needs of international medical graduates.

The International Clinical Fellowship Programme (ICFP) provides a route for overseas doctors wishing to undergo structured and advanced postgraduate medical training in Ireland. The ICFP enables suitably qualified overseas postgraduate medical trainees to undertake a fixed period of active training in clinical services in Ireland. The programme is offered over one to two years of clinical training, after which the overseas doctors will return to their country of origin. In certain circumstances, the period of training may extend to three years.

The purpose of the ICFP is to enable overseas Trainees to gain access to structured training in active clinical environments that they cannot get in their own country, with a view to enhancing and improving the individual’s medical training and learning and, in the medium to long term, the health services in their own countries.
Train with a Consultant

The Programme will allow you to access a structured period of training in Ireland in leading Occupational Health Departments around Ireland. You will follow a structured curriculum and be attached to a consultant trainer – fully participating in the clinical work of your trainer’s team.

During your training in Occupational Medicine, you will be exposed to both the service sector and the industrial sector. Exposure will include experience within Healthcare and exposure to select areas of the industrial sector which may include engineering, electronics, manufacturing, pharmaceutical, chemical and transport. During your time in Ireland, you will attend Occupational Health clinics, carry out industrial/worksites visits and assess Occupational clinical cases which should involve audiology, psychosocial, respiratory, dermatological, toxicological and musculoskeletal conditions.

Participation in on-call is viewed as a key component of training and therefore Trainees on the International Clinical Fellowship Programme are advised that they may be required to participate in the on-call rota of their department.

Structured Educational Programme

As well as workplace based learning will have the opportunity to gain additional learning through our formal educational programmes including:

- Study days
- Mandatory and optional courses
- Society Meetings and Conferences
- Lectures
- Journal club
- Audit
- Research

These elements of the training programmes give doctors an opportunity to expand their knowledge base within their speciality as well as honing their core knowledge and clinical judgement skills needed to enhance their career and take up senior positions.

“It gives me a great opportunity to be trained in an excellent accredited programme. The Irish Training system is a unique form of training. It’s hands on training and it gives you huge responsibilities with close and monitored supervision. The Irish training System has many advantages which include research, clinical duties, teaching and dedicated courses run by RCPI.”

Dr Khalid AlHarbi
Clinical Fellow in Cardiology
Supporting your move to Ireland

We know that moving to another country involves a lot of preparation and paperwork. We are committed to making this process as easy as possible for you, once you have been accepted onto our international training programme.

The support we offer in association with Castel Education, an agency that specialises in supporting international students coming to Ireland, includes:

- English language tutoring
- Visa and immigration assistance, including liaising with the Irish Embassy on your behalf
- Helping you apply for registration with the Irish Medical Council
- Helping you make travel arrangements
- Collecting you at the airport in Ireland
- Helping you find suitable accommodation
- Helping your family members move to Ireland, e.g. finding suitable schools
- Assistance with setting up banking and mobile phone accounts
- Emergency telephone support

Special Interest Modules

We are now offering Special Interest Training in Medical Specialties. For doctors continuing their International Clinical Fellowship Training in Ireland, the duration will be one year. For doctors who have completed a minimum of two years Fellowship Training in a recognised, structured training Programme, the duration will be for a minimum of two years. The first year will consist of core specialty training with exposure to the Special Interest, the second year of training will be focused on the Special Interest area.

Please contact the International Affairs Department for further information on these Special Interest Modules.

Who is this Programme for?

**Designed for**
Doctors who have completed their four/five-year National Residency Programme and examinations.

**Duration**
Two years with possibility of a third year if a candidate holds MRCPI or its equivalent.

**Entry requirements**
- Completed primary medical degree through English
- Completed a structured internship
- Completed four/five-year National Residency Programme and incorporated examinations
- Completed Saudi/Arab Board Examinations
- Completed Licentiateship of the Faculty of Occupational Medicine (LFOM) examination
- Eligible to be registered with the Irish Medical Council (Supervised Division)
- Sponsored by your National Training Body
- IELTS with an overall band score of 7.0 and a minimum score of 6.5 in each of the four domains or OET with a minimum score of B in all four domains*
- Have at least one year’s experience post-residency training in your chosen specialty

**Desirable**
*Priority will be given to candidates who also hold MRCPI or MRCPUK.*

* The entry requirement IELTS/OET score is not required to be eligible for interview but is mandatory to achieve as soon as possible once an offer on the programme is made. Our partners Castel Education offer individually tailored courses to help trainees achieve the mandatory score in a timely fashion ahead of their arrival to Ireland. Trainees are recommended to gain their IELTS or OET by 10 April 2020.

In addition to the general requirements outlined above applicants in certain specialties will also be required to meet specific requirements. See our website (www.rcpi.ie) for further details.

**Certification**
Certificate of Completion of Clinical Fellowship Training in chosen specialty issued by the Royal College of Physicians of Ireland.
