**Re: 1. NIAC Recommendations re COVID-19 Vaccination after laboratory confirmed COVID-19 infection
2. NIAC Recommendations re COVID-19 vaccination**

Dear Tony,

In a review of the documents we noted two typos for correction in document 1 and a paragraph that had been inadvertently deleted in document 2.

The paragraph in document 2 makes reference to vaccine selection for immunocompromised persons as per previous guidelines.

Sincerely,

Karina Butler
Imc 03054
